Since 2014, TAFE Western has been expanding our scope to build friendships with overseas partners. As a part of our international approach we are excited to be sending 20 students to China in 2015 as part of our new Outbound Mobility Program. The purpose of the Program is to concurrently increase knowledge and awareness of Chinese culture for our students, while giving them the opportunity to gain experience in their respective professional industries in an international setting.

As a part of establishing the Outbound Mobility Program, we are here to establish strong links with organisations who could develop a meaningful program for our students. We hope that any forthcoming arrangements lead to ongoing fruitful relations between our two organisations, and we are most grateful for the generosity you have shown in giving your time.

If you are interested in building a partnership with TAFE Western for student visits, the following information may assist you:

- Students will visit for approximately 2 weeks (10 working days)
- Students can observe the activities of your organisation and/or assist under supervision of you staff
- A supervising teacher will accompany the students and will assist with their activities
- Students will only have very basic Chinese language skills
- Students will volunteer to participate in this program and are therefore highly motivated and keen to experience your culture and your working environment.
