

# TAFE WESTERN **VOICE THREAD**

Introduction for TAFE Western Staff

## What is it?

VoiceThread is cloud based application that allows you to create and share documents, presentations, images, audio files and videos through a series of recordings. It is a cross between a standard presentation and a discussion board.

The only system requirement is an up-to-date version of Adobe Flash. VoiceThread will work in any modern web browser and on almost any internet connection.

## How it assists teaching

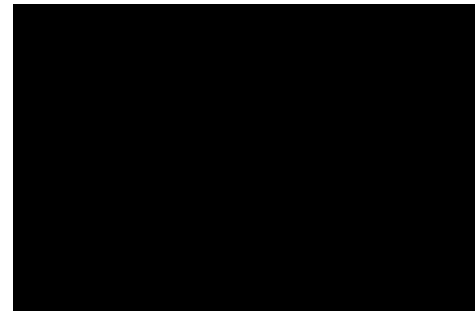

- Embed your threads in your learning platforms
- Participants do not have to be located on a TAFE or public school campus to use VoiceThread
- Students can create their own VoiceThreads
- **Asynchronous collaboration** - VoiceThread can be used in many cases in place of a forum. It evokes a more a 'human' feel with the ability to leave voice and video commentary in addition to text comments if the participant prefers. A topic can be initiated via the facilitator, with the addition of a simple picture or presentation ready for participants to respond.
- **As a narrated presentation** - VoiceThread can be used to make a visual presentation, with your narration. This is an opportunity for very engaging information delivery.
- Instructions / demonstration for a student activity

## What do I need?

- A VoiceThread account (create your own at <https://voicethread.com/>)
- A tablet, smart phone or PC

## Get started

- Create an account. Click [here](#).
- Watch setting up your account. Click [here](#)
- Start creating
